Frontend modules – UI design -> Sushma Erra

Application testing, Backend - Database models, controllers ->

Venkata Siva Boyalla

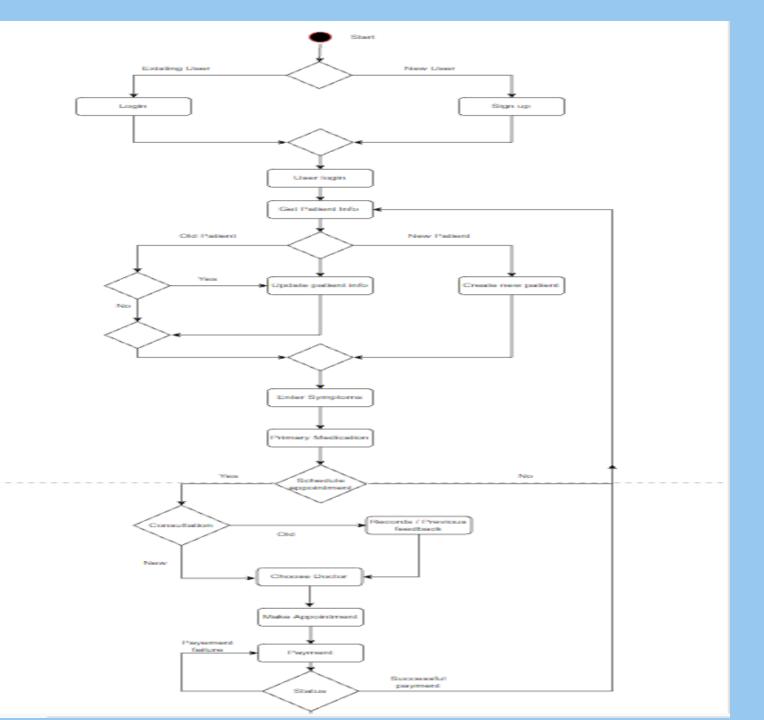

Mockup screen design, Service integration, Frontend modules -

> Yashwanth Rayavarapu

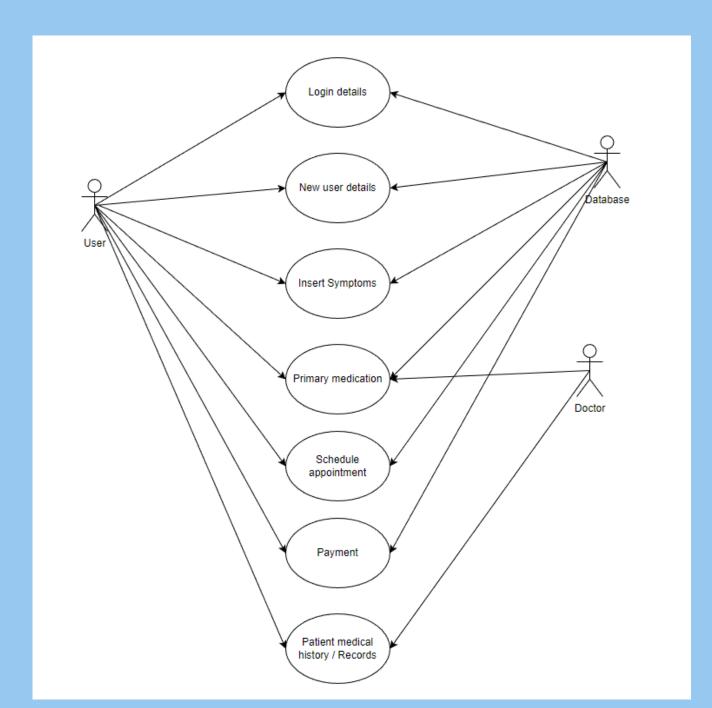

ACTIVITY

USE CASE DIAGRAM

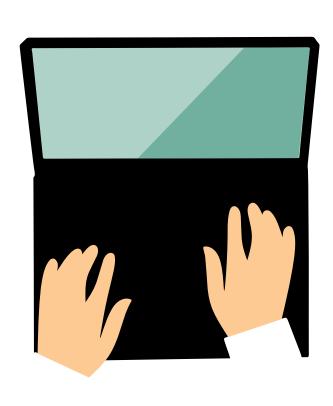

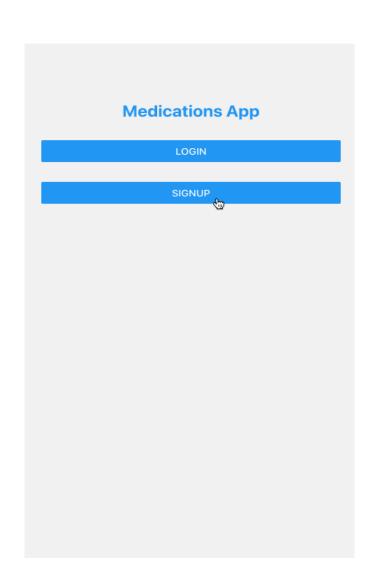

WHAT HAS CHANGED:

- We have developed the back end of our application using spring bot.
- We have used database connections like spring data and postgres sql.
- We have also used libraries like formic and yup libraries.
- We have used react native and java script for running the application.
